Sir:

In response to the Office Action dated January 28, 2002, please amend the above-identified application as follows:

**IN THE CLAIMS:**

**Please enter the following amended claims:**

1. (Twice Amended) A method of allocating data transmission channels to a mobile station in half-duplex mode in a mobile telecommunications network that uses packet mode and has multiple access by multiplexing transmission channels, comprising:

allocating the transmission channels to a mobile station, respectively in a "down" direction from the network to the mobile station, and in an "up" direction from the mobile station to the network;
